Johann Urb: becoming an actor just happened to me

Johann was born in Tallinn, Estonia, and (0) A the first ten years of his life living in the Soviet-occupied country, before moving to Finland with his mother. At the age of 17, he decided it was time to move again — this time (26) _____ the Atlantic Ocean to the United States. Instantly on arrival, he knew — this was the country he (27) _____ in.

Johann did not (28) _____ an actor straight away. First, he started a (29) _____ in modelling and took part in fashion shows both in the US and Europe. And even though this (30) _____ to acting, Johann says he still models from time to time because it's fun!

Johann notes he has always loved both modelling and acting, though acting happens to be his true calling. How this came about, no one is quite sure, but it did indeed happen. "I didn't know I would be (31) _____ actor. It just happened to me."

Millions of people go to Los Angeles, hoping to make their dreams come true. What advice would Johann give these young actors? "There's a lot of competition here, but also (32) _____ of opportunity! It's mostly a marathon, not a sprint. Be ready for this, remain strong, and you will be able to overcome any challenge!"

Read the text and the statements (33-39) on the next page, and decide which statement is true according to the text. Tick (✓) the correct option (A, B or C).

An example (0) has been done for you.

School days

It was January in Northern New York State, sixty-seven years ago. Snow lay deep everywhere. It loaded the bare limbs of oaks and maples and beeches; it bent the green boughs of cedars and spruces down into the drifts. Billows of snow covered the fields and the stone fences.

Down a long road through the woods, a little boy trudged to school, with his big brother Royal and his two sisters, Eliza Jane and Alice. Royal was thirteen years old, Eliza Jane was twelve, and Alice was ten. Almanzo was the youngest, and this was his first going-to-school because he was not quite nine years old. He had to walk fast to keep up with the others, and he had to carry the dinner-pail. "Royal ought to carry it," he said. "He's bigger than I am." Royal strode ahead, big and manly in boots, and Eliza Jane said, "No, 'Manzo. It's your turn to carry it now, because you're the littlest." She always knew what was best to do, and she made Almanzo and Alice do it.

The cold nipped Almanzo's eyelids and numbed his nose, but inside his good woolen clothes, he was warm. They were all made from the wool of his father's sheep. Girls tied heavy veils over their faces when they went out in winter. But Almanzo was a boy and his face was out in the frosty air. His cheeks were red as apples and his nose was redder than a cherry, and after he had walked a mile and a half he was glad to see the schoolhouse. It stood lonely in the frozen woods, at the foot of Hardscrabble Hill. Smoke was rising from the chimney, and the teacher had shoveled a path through the snowdrifts to the door. Five boys were scuffling in the deep snow by the path.

Almanzo was frightened when he saw them. Royal pretended not to be afraid, but he was. They were the big boys from the Hardscrabble Settlement, and everybody was afraid of them. They smashed little boys' sleds, for fun. They'd catch a little boy and swing him by his legs, then let him go headfirst into the deep snow. Sometimes they made two little boys fight each other, though the little boys didn't want to fight and begged to be let off.

These big boys were sixteen or seventeen years old, and they came to school only in the middle of the winter term. They came to thrash the teacher and break up the school. They boasted that no teacher could finish the winter term in that school, and no teacher ever had.

This year, the teacher was a slim, pale young man. His name was Mr. Corse. He was gentle and patient and never whipped little boys because they forgot how to spell a word. Almanzo felt sick inside when he thought how the big boys would beat Mr. Corse. Mr. Corse wasn't big enough to fight them.

There was a hush in the schoolhouse, and you could hear the noise the big boys were making outside. The other pupils stood whispering together by the big stove in the middle of the room. Mr. Corse sat at his desk. One thin cheek rested on his slim hand, and he was reading a book. He looked up and said pleasantly, "Good morning."

Farmer Boy by Laura Ingalls Wilder

0. The story took place in

- A ☐ spring.
 B ☐ summer.
 C ☒ winter.

Number of points:

Task 3 (8 points)

Read the texts (A–E) about five of the world’s most talented kids. Then read the statements (40–47) and decide which text they are about. Write the correct letter (A–E) after each statement. The letters can be chosen more than once.

An example (0) has been done for you.

A Ryan Wang is a music genius who recently played the piano at the 2013 American Protégé International Piano and Strings Competition. Oh yeah, and he is five. When he was a toddler, Wang played on an electric guitar. At the age of four, his mother took him to formal lessons. In no time, Wang had mastered 18-page concertos. Since he is still so young, the world will have to wait to see how Wang’s talents play out.

B Akrit Jaswal. Although he is only 20, Akrit Jaswal is already a practising doctor and has been working in the field for more than a decade. He began walking at an early age, talked before the age of one and was said to have been reading Shakespeare when he was five. When Jaswal was seven, he successfully performed a surgery for a family who could not afford healthcare for their daughter. At the age of 12, Jaswal became the youngest student to be admitted to medical school in India.

C Priyanshi Somani began studying mental maths at the age of six. In 2010, at age eleven, Somani was the youngest participant at that year’s Mental Calculation World Cup. He achieved 100% accuracy in addition, multiplication and square roots. His achievements as a human calculator have earned his recognition in both the *Guinness Book of World Records* and the *Limca Book of World Records*. Aside from solving complex mathematical problems, Somani enjoys chess and table tennis.

D Christopher Paolini is best known for writing the *Inheritance Cycle*, which consists of three lengthy novels. Paolini grew up in Paradise Valley, Montana, where he was homeschooled. After graduating at the age of 15, Paolini began writing the *Inheritance* series. Although childhood success as an author is incredibly rare, Paolini became a *New York Times* bestselling author at the age of 19.

E Giuliano Stroe may look like an ordinary kiddo when wearing a shirt, but the Romanian ten-year-old is actually one of the world’s youngest bodybuilders. He began lifting weights when he was only two years old, and has since decorated the pages of the *Guinness Book of World Records* for his unmatched achievements. Assuring others that Giuliano indeed works out at his own will, his father has said that “[Giuliano] is never allowed to practice on his own, and if he gets tired we go and play.”

At a very early age, this kid's parent took him to lessons to learn the skill. (0) A

This kid is in the Guinness Book of World Records because of his physical abilities. (40) _____

40

This kid has already been working in his field for ten years. (41) _____

41

This kid has some other hobbies besides the talent. (42) _____

42

This kid has high school education but has never attended school. (43) _____

43

We do not know yet how this kid's talent will develop. (44) _____

44

This kid helped someone in need. (45) _____

45

This kid can solve difficult tasks in his head. (46) _____

46

This kid's work became extremely popular and was sold in very large numbers. (47) _____

47

Number of points:

Task 4 (8 points)

Read the text. Use the **correct form** of the words in **brackets** to complete the text (48-55). You can write **only one word**.

An example (0) has been done for you.

What should kids drink at school?

England plans to make energy drinks (0) illegal (**legal**) for kids. In the USA, in Detroit, school drinking fountains have been turned off because the water is unsafe to drink.

The government in England plans to put an age limit on the sale of energy drinks. Most supermarkets in England already do not sell the drinks to (48) _____ (**child**) under 16.

By combining sugar and caffeine, energy drinks can give a short, strong feeling of excitement. But many teachers in England say the drinks are causing kids to behave (49) _____ (**bad**) in class.

The government is worried about the effects the caffeine and sugar are having on kids. The caffeine can cause problems like headaches, stomach aches, and sleep problems. The sugar damages (50) _____ (**tooth**) and is causing many kids to gain too much (51) _____ (**weigh**).

Water is (52) _____ (**usual**) the safest and the (53) _____ (**good**) liquid for people to drink. But in Detroit, the leaders of the public schools have shut off the water to the drinking fountains in all of the schools. That is because in many of the schools, tests have shown that it is (54) _____ (**danger**) to drink.

Many of the schools in Detroit are old and have not been kept in good shape. No one knows (55) _____ (**exact**) what is causing the water problems, but many people think it is because of the old water pipes in the school buildings. So, for now, all drinking water for the students will have to come from bottled water or water coolers.
